## Gardenside celebrates its 15th anniversary!

Gardenside Ltd., founded in 1994, continues its tradition as the world's premier teak furniture company with an exciting new addition to our family of products, Lister®.

We are proud to be the exclusive distributors of Lister® USA for North America. Lister®, founded in 1883, is the originator of classic English Teak leisure furniture, a tradition that continues developing to this day. Always on the cutting edge, Lister® has collaborated with a number of world renowned furniture and landscape designers to provide both contemporary and classic teak furniture ranges that combines fine quality with stylish sophistication. These highly regarded designers include Arne Jacobsen, Sir Robin Day, Frans Schrofer, Sir Edwin Landseer Lutyens, and more. In addition to teak, stainless steel and modern textiles have been incorporated into selected designs. These products have revolutionized the industry by providing sleek design, high style, and beauty to fine teak furniture.

Our new catalog unveils a sneak peek at our exclusive Lister® brand family of products starting on page 2. To view the full line of Lister products, please visit our website at [www.gardenside.com](http://www.gardenside.com).

FSC-SECR-2009

Also new to our catalog, we offer a section of Forest Stewardship Council (FSC) certified teak furniture. Gardenside is well aware that many of our customers would like an environmentally responsible alternative to traditional teak furniture. Our FSC certified line of products offer the same stylish designs and functionality with the assurance of the FSC symbol. Refer to page 14 for the complete listing.

Gardenside fine teak products can be identified throughout the country and the world as a symbol of excellent taste and refinement, while providing purpose and comfort in today's hectic world. Our products have been selected by designers and architects as the fine teak furniture of choice for placement in many fine universities, corporations, healthcare institutions, government locations, museums, resorts, shopping centers, as well as private residences. This long and respected list includes Stanford University, Cornell University, Farm Credit Services of America, Oracle Corporation, Pixar, Four Seasons Resort, The Plaza in New York, as well as the Royal Gardens in London, England.

Thank you to our customers for continuing to make Gardenside the respected name for over 15 years in delivering fine teak furniture with premier quality, superior craftsmanship, and contemporary and classic design.

industry partner

Founded in 1883, Lister teak furniture has enhanced many of the world's most famous gardens. The designs are as timeless as teak is enduring, combining comfort and style with total durability.

Gardenside is proud to be the exclusive U.S. distributor of Lister teak furniture. The following twelve pages offer a preview.

## The Arne Jacobsen Range by Arne Jacobsen

Danish born Arne Jacobsen is one of the world's most famous furniture designers, renowned for 'The Ant' and 'The Number Seven' chairs. Today, his designs are highly influential in shaping modern furniture, and continue to be faithfully replicated by Lister.

Initially training as a mason, Arne studied architecture at the Royal Academy of Arts, Copenhagen. His design, 'The Ant,' propelled Arne into worldwide fame in 1952, as the first as a number of lightweight chairs comprising seat and back in one piece of moulded wood. Model '3107' was launched in a variety of colors, and marks an important success in Danish furniture history with more than five million copies manufactured to date.

## The Broadway Range by Sir Robin Day

Illustrious British designer Sir Robin Day has worked with Lister to develop the Broadway range, a modern interpretation of his classic café set that first appeared at the Royal Festival Hall in 1951.

Robin graduated from the Royal College of Art in 1938 and has won a number of prestigious design awards. He is best known for his injection moulded polypropylene stacking chairs—an icon of 1960s style. One of the most democratic modern designs of the 20th century, over 14 million chairs have since been sold 23 countries.

## The KAAT Range by Wilfried Henriks & Steven Stals

Garden designer and landscape architect Wilfried Henriks and Belgium-based interior architect Steven Stals have together helped to change the direction of Lister.

Through their partnership the KAAT range was borne—delivering an exciting blend of cutting-edge architecture for the garden. By combining their talents, our furniture has further evolved to produce simple strength and power that simultaneously offers comfort and style.

Wilfried studied at the Horticultural Institute in Vilvoorde, Belgium and participated in workshops at Ecole de Beaux Arts, Fountainebleau in France by René. Steven studied at the Royal Academy of Fine Arts, and the National Institute for Architecture and Town Planning, in Antwerp and UiaH, University for Industrial Arts, Helsinki, Finland.

## THE GREEN SECTION: FOREST STEWARDSHIP COUNCIL (FSC)

### **Gardenside and FSC: The beginning of a beautiful friendship**

At Gardenside, we listen to our customers and incorporate their ideas whenever possible. Over the years, customers have specifically asked if we could provide an environmentally responsible yet economically viable teak furniture solution. This demand has led to our exciting new FSC teak furniture line.

Gardenside has the distinct advantage of being able to design, manufacture, and distribute its own furniture, making it possible for us to offer this exceptional FSC line. Consumers wishing to support healthy forests and communities should insist on the FSC label when purchasing wood furniture products.

The Lister Mendip 5" bench leads the product line. This bench, one of our most popular, follows the same look and design as our traditional teak bench, but is composed of FSC mixed source wood.

Other FSC approved products include the Rosevale 48" round table and the Dover dining armchair. Both stylish and functional, these products offer an environmentally responsible alternative.

### About FSC

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way.

Landowners and companies that sell timber or forest products seek certification as a way to verify to consumers that they have practiced forestry consistent with FSC standards. Independent certification organizations are accredited by FSC to carry out assessments of forest management to determine if standards have been met. These certifiers also verify that companies claiming to sell FSC certified products have tracked their supply back to FSC certified sources. This chain of custody certification assures that consumers can trust the FSC label. For more information about FSC at the International level, please visit [www.fsc.org](http://www.fsc.org).

## The Green Section: Ecologically Engineered Teak

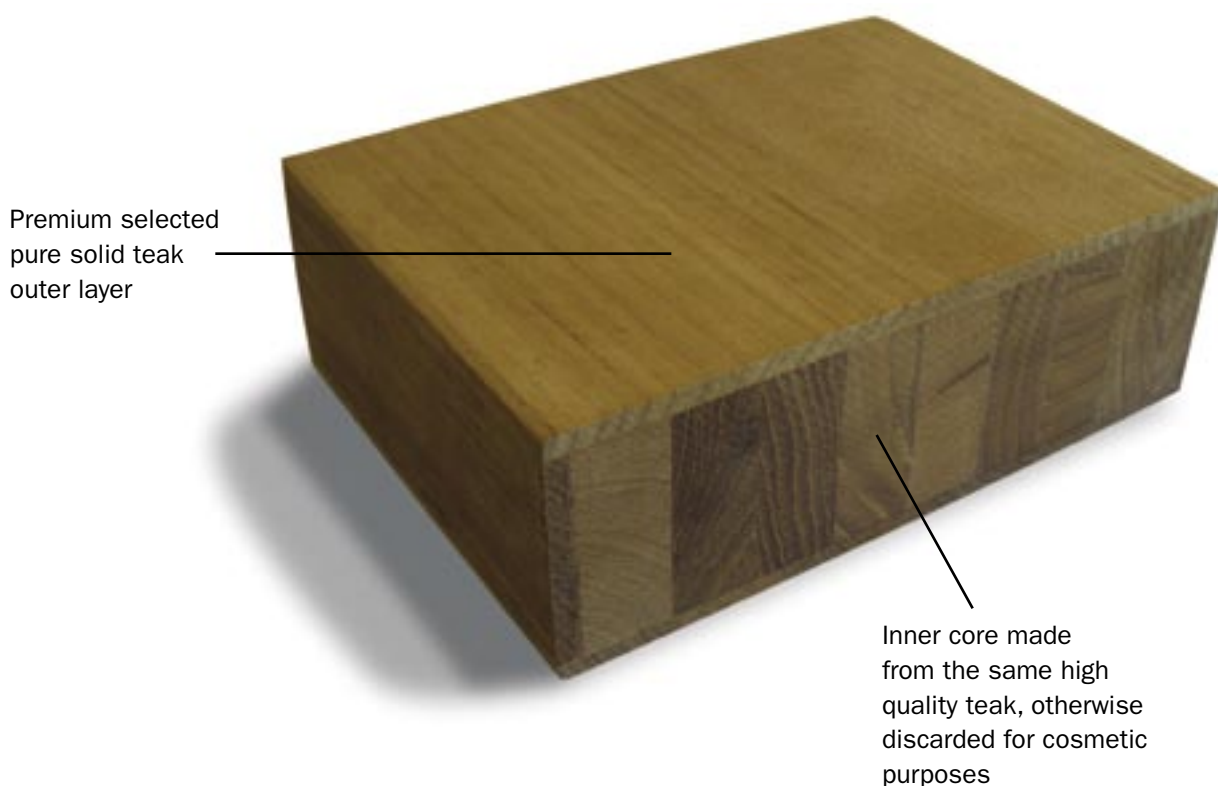

### Ecologically Engineered Teak:

#### A Better Product, A Greener Planet

At Gardenside, we're well aware that teak and other hardwoods are becoming scarcer every year, which is why we've begun conserving in a big way. *Ecologically Engineered Teak (E.E.T.)* is a recently-developed alternative to our previous method of creating high-quality teak furniture. It contains only 10% of the rare and expensive teak we've used in the past, yet the final product is stronger, more stable, and outwardly indistinguishable from top-of-the-line furniture customers have come to expect from Gardenside.

#### How it's Done

Using high-tech adhesives developed by the space and automotive industries, E.E.T. sandwiches an outer layer of high-quality plantation teak around a core of short, solid pieces created from other parts of the tree—perfectly good teak, but otherwise discarded for cosmetic reasons, such as knots, inconsistent grain, or slight discoloration. Components are manufactured in straight and curved pieces to form the finished furniture, and the end product is every bit as beautiful—yet more durable than ever.

3018 Bistro Folding Armchair

1320 Capri Round Folding Table 39"

The comfortable Bistro Armchair folds easily, making it portable and compact to store. Use them for backyard dining or take them on your next beach adventure.

The Capri Round Folding Table weighs less than other Gardenside tables, but it's made to the same quality standards and works well with our other designs. One side of this versatile table can be folded down to create a semicircular table that fits neatly against a wall or railing. Fold down both sides, and the Capri table slims down for easy storage.

## Dining Tables & Chairs

1620 Palazzo Square Dining Table

3548 Palazzo Armchair

With its clean linear shape, the Palazzo Armchair is both spacious and versatile. Alone or with the Palazzo Square Table, the Palazzo Armchair provides both comfort and style for any residential or commercial space.

The simple yet striking design of the Palazzo Square Table allows it to fit equally well into both classic and contemporary settings. Its broad surface area, ample leg room, and solid construction combine perfectly for form and function.

1312 Capri Round Extension Table

3018 Bistro Folding Armchair

Leaves fold out from the center of this lightweight round dining table to extend it into an oval shape. Extended, the Capri Table comfortably seats six; unextended (left), it seats four.

## Dining Tables & Chairs

1606 Rosevale Round Dining Table 48"

3522 Newport Reclining Armchair

The elegant 48" Rosevale Round Dining Table is large enough to seat four comfortably, yet it still fits neatly into a smaller environment.

The backrest of the versatile Newport Reclining Armchair can be adjusted to six comfortable positions. Set the armchair to its upright position while dining, then choose any of the five reclining positions for more relaxed seating. Solid brass fittings enhance the chair's appearance and durability.

## Parasols

### The Gardenside Parasol

Gardenside's commercial grade parasols are manufactured to combine graceful designs, smooth lift systems, and exceptional durability. Every component of our parasols features the highest quality material. Gardenside offers 1½" and 2" diameter poles made from solid teak, oak, and powder coated aluminium. Hubs and finials are cross-grain laminated for strength. Our canopy fabrics are fade and mildew resistant. Stress points have a double layer of fabric, double-stitched with UV protected thread. Canopies are vented to provide stability during wind gusts, and we make all fittings with non-corrosive stainless steel and solid brass. In addition to our stock product line, Gardenside can manufacture custom parasols to fit your specific size and color requirements.

### Pricing Policy

We offer trade prices to architects, designers, landscape architects, contractors, and developers of commercial sites. Trade prices are also available directly to purchasing agents of commercial sites, such as business complexes, shopping malls, resorts and hotels, retirement communities, hospitals, golf and country clubs, city, state, and federal government projects, wineries, restaurants, churches, healthcare facilities, museums, botanical gardens, campgrounds, parks, and recreational sites. We'll gladly extend trade pricing to all registered architects and designers who wish to order our products for personal use as well.

### Placing an Order or Requesting a Quote

Feel free to call us with any questions you may have before you place an order or request a quote. Please send your order on business letterhead and provide us with the product numbers, product names, and quantities you're interested in ordering. If you're ordering parasols or cushions, please specify the color you want. We'll inform you of your order total after calculating shipping charges based on weight and shipping destination. For delivery in California, add sales tax.

### Payment

A company check, money order, or credit card payment is required prior to shipping. We accept Visa, MasterCard, and American Express.

### Shipping

Most of our furniture can be shipped via FedEx Ground or UPS. Please provide us with a street address, zip code, and daytime telephone number. Large quantity orders and heavy products will be shipped via motor freight.

### Delivery

Delivery time is seven to ten working days from receipt of payment depending on the destination. Deliveries outside the 48 contiguous states may take longer. Freight delivery is curbside. Inside delivery can be arranged for an additional charge. Please inspect cartons upon arrival, making note of any damages on cartons when signing delivery receipts. Save original packing materials and call us immediately if you find any damage to your furniture.

### Product Information

Our furniture is sub-assembled and shipped in carefully packed cartons, lowering shipping costs and reduces the risk of damage to your furniture. Benches and armchairs consist of four fully assembled main units: back frame, seat frame, left and right end frames. Mortise and tenon joinery provides easy and precise joining. Dowels and brass screws complete the assembly. Most table products have standard legs which attach firmly and easily into the brass leg unit with a washer and nut.

All fittings—dowels, screws, hex wrenches, etc.—are packed together in a cloth bag ready for easy assembly. Carefully prepared instructions and drawings are provided for each product. Be assured that we have made every effort possible to make assembly of our products easy and enjoyable. Steamer Chairs, Clifton Chairs, Newport Reclining Armchairs, Bistro Chairs, Lutyens Benches, and the Island Lounge Chair are shipped fully assembled.

### Gardenside Warranty

Our teak products sold to the original owner are guaranteed against defects in workmanship for three years. All folding chairs are warranted for one year. If any item covered under this warranty is defective, a replacement part or a new unit will be exchanged for the defective part(s). Defects are defined as any imperfection in workmanship which will impair the use of the product. This warranty does not cover:

1. Labor or assembly
2. Damage resulting from accident, alteration, misuse, tampering, negligence, or abuse
3. Acts of nature, improper assembly or maintenance, normal weathering, or wear including hairline cracks
4. Damage that was a direct affect of weather-related conditions including salt water

In no event shall Gardenside, LTD. be liable for any incidental or consequential damages resulting from the use of these products.

### Claims

Claims for loss or shortages must be made within three days of receipt of goods.

### Returns

Returns are not accepted without our prior authorization and are subject to a minimum 20% stocking fee.

### Damage

Responsibility for safe delivery of goods is assumed by the carrier. It the customer's responsibility to note any damages or shortages on the carrier's bill of lading upon delivery. Failure to adequately describe external evidence of damage or loss may result in the carrier refusing to honor the claim. We will assist the customer in settling claims, but we are not responsible for damage in transit.

In cases of concealed damage (damage not apparent until the merchandise has been unpacked) a written request for inspection by the carrier's agent must be made within seven days of the delivery date. A claim must then be filed with the carrier since such damage is the carrier's responsibility.

### Restocking Fee

Any returns due to a change made by the customer will be handled by Gardenside on an individual basis. If the return is allowed, all freight charges will be paid by the customer and a 20% restocking fee will apply.

Mill Valley, CA

### **Industry Standard**

Gardenside furniture provides an unequaled blend of ecologically harvested premium teak, design refinements, precision craftsmanship, and value. All of our products have been rigorously tested for strength, durability, and comfort. Our commitment to our customers, our products, and the environment is evident in every piece of furniture we produce.

### **Ecologically Responsible**

The growth of teak wood is a natural process which benefits the environment. When plantation grown teak is harvested, a new generation of trees is planted and grown to maturity. The growth and harvest cycle continues, providing sustained and environmentally responsible land management. The natural process of growing teak does not require toxic chemicals or mining, and it doesn't the pollution associated with the production of plastic or metal furniture.

### **Durability**

Teak is incredibly durable in all weather conditions. It's an extremely dense grained hardwood which resists rotting, warping, shrinking, and swelling. Its

high natural oil content continually preserves the wood so it can be left outdoors for decades. How durable is teak? The first outdoor teak benches were made from the decking of old sailing ships. The teak on these ships was in such good condition when the ships were to be scrapped that the wood was recycled and used to build outdoor furniture. Public parks all over England are furnished with teak benches, some of which are close to a century old.

### **Care**

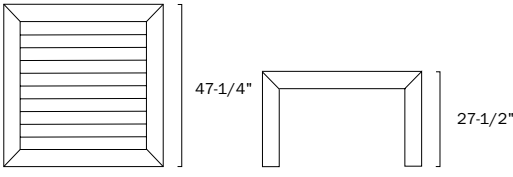

Gardenside furniture is made from the highest quality teak. Unfinished and left outdoors, it will weather to a silvery gray patina (see photo). To many Gardenside customers, this natural aging process helps the furniture blend comfortably into its environment. Customers who prefer to maintain the rich color of new teak should apply a yearly layer of teak sealer (See *Accessories*, page 61).

Precision craftsmanship, rigid, tight-fitting mortise and tenon joints, and fine, smoothly-sanded components define all Gardenside products. These efforts combine to create virtually maintenance-free outdoor furniture.
